

Doing business with us

We're sourcing licensed local suppliers to support our head office and manufacturing facilities across North America.

At ROCKWOOL, we focus on building long-term relationships with our suppliers in our North American markets through mutual trust and partnership.

When you think about building material manufacturing, you might picture line operators, warehouse workers, and industrial engineers, but there's so much more. Those workers are one very important part of the equation, but it takes a team of employees alongside a reliable and high-quality supplier network to ensure the operations of our manufacturing plants.

In addition to our three manufacturing facilities we also have our corporate head office, located in Milton, which requires the support of outside suppliers to maintain the facility.

"Durabond Janitorial provides daily cleaning services for ROCKWOOL at both their Milton plant and head office. Our cleaning staff are always commenting on how pleasant and helpful the ROCKWOOL staff and management are. The health and safety policies and procedures that they follow ensure our staff are always working in a secure environment and we look forward to continuing our positive relationship."

– Chris, General Manager, Durabond Janitorial Services
